

Main Route Traffic Flow Changes 2040 (Daily flow totals)

A428 Black Cat to Caxton Gibbet
Traffic Flows – ADT – 2015 & 2040 Without Scheme / With Scheme

The Scheme results in increases in traffic flows on the A421 and the new dual carriageway road compared to the existing A428.

There are some increases on other routes linking into the A421/A428, such as the A1, but the proportional increases are relatively small.

Changes shown on roads connecting into the A428 are mostly at the A428 junctions and these are quite localised impacts.
